🔗 coded-with-aryan0426

Education

ITM (SLS) Baroda University

July 2023 – Present

B.Tech in Information Technology

- **Coursework:** Operating Systems, Database Management System, Computer Networking, UML, Agile Methodologies, DSA, Machine Learning & Computer Vision

Experience

Java Full Stack Developer Intern

Vadodara, Gujarat

Bharti Soft Tech

Nov 2025 – May 2026

- Developed and deployed **full-stack web applications** using **Java, Spring Boot, React.js, and Oracle**, delivering **scalable enterprise solutions**.
- Implemented **RESTful APIs** and integrated **microservices architecture**, improving **system modularity and reducing deployment time by 25%**.
- Collaborated with cross-functional teams to design and optimize **database schemas using Oracle**, enhancing **query performance by 35%**.

Full Stack Web Developer Intern

Vadodara, Gujarat

Avista Web Technologies

June 2022 – Sept 2022

- Engineered **responsive and interactive web applications** using **HTML5, CSS3, JavaScript, and PHP**, ensuring **cross-browser compatibility and mobile optimization**.
- Architected and optimized **scalable MySQL database schemas and queries**, achieving a **30% improvement in application response time and data retrieval speed**, ensuring **reliable access for over 10,000 active users**.
- Collaborated in **daily Agile stand-up meetings** and contributed to **version control using Git and GitHub**.

Projects

Smart Accident Detector – YOLOv8 Model

[aryan0426/AccidentDetectorModel](#) ✉️

- Developed real-time **collision and Fire detection system** using **YOLOv8** on live and recorded video.
- Implemented **OpenCV + FFmpeg pipeline** with **audio alerts** and **timestamped logs** across **100 test scenarios**.
- Achieved **90% detection accuracy** through comprehensive **model training** and validation.

Smart Meter Fault Detection

[aryan0426/smart-meter-fault-detection](#) ✉️

- Developed real-time **anomaly detection system** for smart meter readings using **Random Forest** and **XGBoost** algorithms.
- Engineered and preprocessed **large-scale meter data pipelines** for robust fault classification.
- Leveraged **Python, Pandas, Scikit-learn, Matplotlib, and Seaborn** for model development and visualization.

AI Chatbot for Space Navigation

[aryan0426/AIChartBot](#) ✉️

- Designed and deployed an **AI-powered chatbot** using **NLP** to assist users with interplanetary navigation and **real-time query responses**.
- Implemented **Transformer deep learning models** to analyze **space trajectory data** and optimize travel routes.
- Achieved **85% prediction accuracy** for optimal interplanetary paths, enhancing space mission planning efficiency.

Certifications

- **SAP Technology Consultant Professional Certificate** — SAP (Dec 2025)
- **IBM AI Engineering Professional Certificate** — IBM (2025)
- **Product Prioritization Micro-Certification** — Product School (Aug 2025)
- **AI Fluency Framework & Foundations** — Anthropic (Aug 2025)
- **APAC – Solutions Architecture Job Simulation** — AWS (Dec 2024)

Technologies

Programming: Python, Java, C++, JavaScript, SQL

AI/ML: TensorFlow, PyTorch, Scikit-learn, NLP

Databases: MySQL, PostgreSQL, MongoDB, Oracle

Web: ReactJS, Node.js, Flask, Django, ASP.NET

Tools & Concepts: Git/GitHub, OOP, SDLC, Agile

Soft Skills: Problem-solving, Communication, Team-work
